Antoine DEVAL

Data & SEO Specialist

Professional Experiences

Data Scientist (Freelance) - Agence Française de Développement
(Paris, FR) - *November 2025 (3-week mission)*

- Development of a complete RAG pipeline: extraction, cleaning and semantic chunking of DOCX documents
- Implementation of an optimized FAISS index with automatic boilerplate detection and multi-signal reranking system (document similarity, chunk matches, coverage)
- Creation of a web application enabling search by text or document upload

Data & SEO specialist - Extens Consulting
(Paris, FR) - *April 2021 to January 2025 (3 years, 9 months)*

- Managed 5 WordPress websites for Extens Consulting, leading to ranking improvements in the SERP, and page speed :
  - Performed keyword research and content gap analysis
  - Wrote/optimized meta tags, titles, and content briefs
  - Optimized site architecture, internal linking, and page speed
  - Tracked organic traffic KPIs via Google Search Console and GA4 connected directly to a Power BI dashboard
- Analyzed customer survey data (NPS, CSAT) using statistical segmentation, surfacing key satisfaction drivers for client recommendations

Business Development Assistant - Certis Europe B.V.
(Maarssen, NL) - *June 2018 to August 2018 (2 months)*

- Competitive Intelligence
- Helped design and implement company-wide Power BI reporting solution, consolidating data from several sources and aiming to reduce report generation time

Skills

Programming
- Python, SQL
- JavaScript, HTML5/CSS3
- Git/GitHub

Data Science & NLP
- Scikit-learn
- FAISS, RAG pipelines
- HuggingFace
- NLP

Data & Reporting
- Power BI
- GA4, Google Search Console

Web & CMS
- WordPress
- SEO On-Page
- Technical SEO, Core Web Vitals

Languages

- English - Bilingual
- German - A2/B1

Education

10-week Data Science Bootcamp - Le Wagon
(Paris, FR) - *June 2025 to September 2025*

Intensive 400-hour program covering the complete data science pipeline:

- **Programming Foundation:** Advanced Python programming, object-oriented programming
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn for exploratory data analysis and statistical computing on datasets with 10k+ records
- **Machine Learning:** Implemented algorithms including supervised learning (regression, classification), unsupervised learning (clustering, PCA), and model evaluation techniques
- **Deep Learning:** Built neural networks using TensorFlow/Keras, including CNNs for image recognition and NLP applications
- **MLOps & Deployment:** MLFlow for experiment tracking, model versioning, and Streamlit for creating interactive web applications
- **Final project :** Medium claps prediction project with Kaggle competition data (NLP, Feature engineering)

Master Digital Marketing - IAE Angers (2019-2021)

Master Management International - University of Modena e Reggio Emilia (Italy) (2018-2019)

Bachelor in International Management - IAE Angers (2017-2018)

Side projects

Development of a tool for Forge of Empires players
Technologies: *Python, Streamlit, Pandas, Plotly*

GitHub: https://github.com/Banamangas | Live App: https://foe-buildings-database.streamlit.app/

- Built interactive web application processing building records with advanced filtering and comparison features
- Implemented data pipeline for Json processing, statistical analysis, and real-time visualizations using Pandas, Plotly and Streamlit
- Created user-friendly interface with multi-criteria search, export functionality, and responsive design serving 100+ monthly active users
- Applied data optimization techniques including efficient DataFrame operations and caching, drastically reducing load times by 80%
- Delivered end-to-end solution from data modeling to deployment
